DGPS students bag 7 awards in Techno Talent Fest

Techno Talent Fest 2018, a celebration of technology, was held at the campus of the Emirates Institute of Banking and Financial Services, Academic City, where students from schools all over Dubai display their technological prowess, creativity and abilities to harness the power of ICT for innovative solutions.

The team from Dubai Gem displayed true talent in the fields of IT and creativity, reaping an impressive array of awards in fields of Digital Designing, Gaming, Digital Representation, Digital Painting, Database Management and Digital Animation.

Winning a total of seven awards overall in a highly competitive event, which had 300 students from 30 schools participating, was a truly impressive achievement by our DGPS team.

This event not only enhanced our students' collaborative skills, but also helped many of them to learn and hone their talent in many unique softwares and platforms. We got an opportunity to get involved and exhibit our creativity, critical thinking and our technical proficiency to the best.

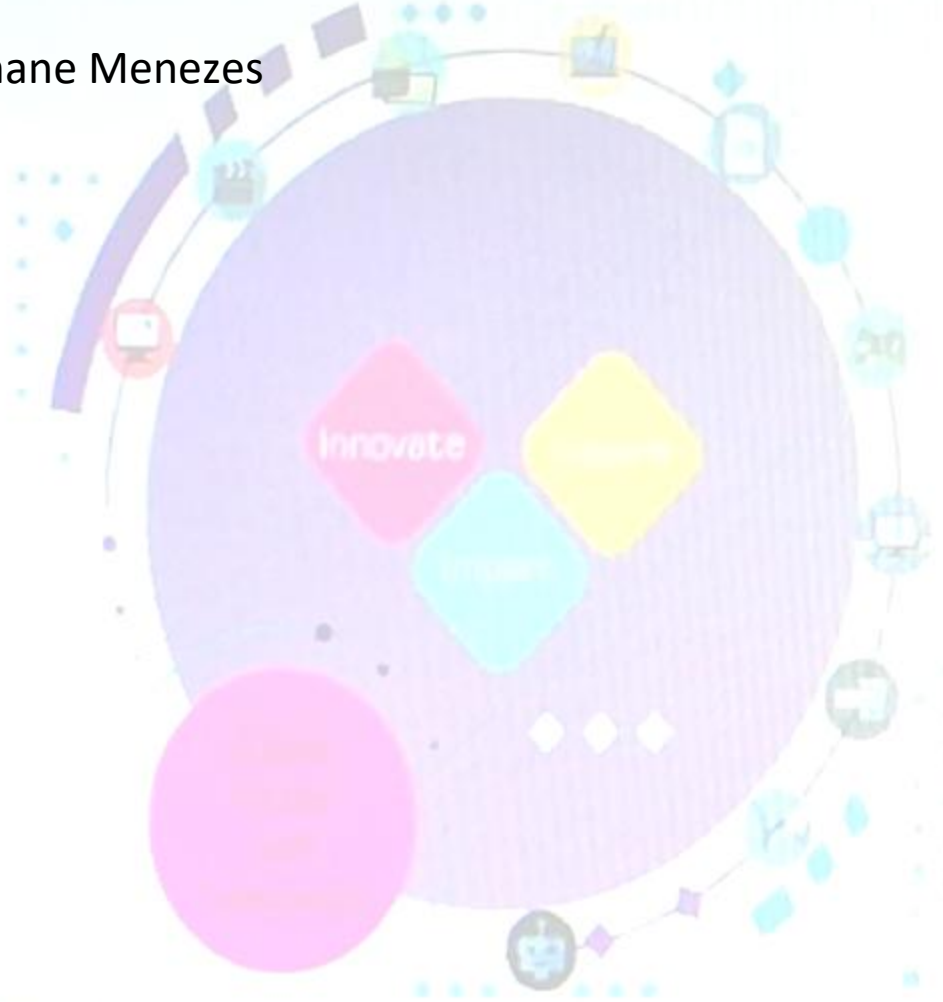

The event took place over the span of a day, with each participant having to present their projects to a panel of judges, who assessed their work based on the overall quality, ease of understanding and presentation.

no Talent Fest UAE

A tangible sense of anticipation built across the auditorium as the award winners were announced. All suspense was soon dissipated, however, when we realized the true potential of our school. Wow! It truly was a rewarding day.
